Flexible Use, Enhanced Talk

Improved Visibility & Operability

Large 1.4-inch Easy-to-Read LCD & Simple Menu Operation
The handset's large, easy-to-see LCD offers a bright, easy-to-read display of characters and numbers. LCD backlight allows easy operation even in the dark.

No more harsh ring tones

10 Polyphonic Ringer Melodies / 5 Ringer Tones on Handset
Instead of unpleasant monophonic ring tones, you can hear a high-quality ringer melody when there's an incoming call.

Easy Caller Identification

Caller ID with 50-Name & Number Call Log*
Thanks to Caller ID* capability, you'll be able to check the number and name (stored in phonebook) of an incoming call on the LCD so you can see who's calling before you actually answer.

* Requires subscription to a Caller ID service offered by a telephone company.

Instant Recall

100-Name & Number Phonebook
Built-in memory stores up to 100 station names and numbers in a single handset. You can access phone numbers quickly. With an optional handset, you can transfer individual names / numbers or the entire directory all at once.

No Need to Stick Around

Telephone Answering System
Save the messages you receive while you're out. Message playback can be controlled from either the base unit or the handset.

Do Something Else While Talking

Hands-Free Speakerphone on Handset and Base Unit
With hands-free speakerphone, you can answer the phone without interrupting what you're doing - whether you're cooking, cleaning, or surfing the Internet. It's also convenient when you need to take notes, use a keyboard, etc. And since speakerphones are incorporated in both the handset and base unit, you can take advantage of convenient Base to Handset intercom.

Bundle Models
